Software Firm Fills Reporting Need in Growing Industries

August 16, 2005- Significant improvements in professional photo reporting software have been made within the rapidly growing fields of thermography, building science, and forensic engineering.

Cincinnati based PDmB, Inc. has announced the release of its DUAL-VIEW™ Photo Report Software.   DUAL-VIEW is a unique report-generating software program that provides quick and easy side-by-side photo comparison to fill a growing need of industry professionals. Included in the software are DUAL-VIEW's powerful EZMark™ highlighting tools that allow pointer arrows, ellipses, and zooming capabilities to emphasize specific details within each image. DUAL-VIEW also provides for efficient entry and reuse of descriptions and notes pertaining to the photos.

The product was designed to give the user flexibility and photo comparison capabilities previously unavailable in photo-reporting products. DUAL-VIEW has a wide range of uses, from the building science fields, including thermal imaging, energy audits, property inspections, engineering, and building restoration, to medical and veterinary thermal imaging and others. "Home inspectors can take full advantage of DUAL-VIEW's Photo comparing abilities. The flexibility, ease of use, and affordability of DUAL-VIEW will quickly position it as a product leader," stated Nick Gromicko, founder of NACHI, The National Association of Certified Home Inspectors.

DUAL-VIEW uniquely fills the need for photo or image comparison software solutions in a wide variety of industries and professions, providing value-added features found in no other product in its price range. Barb Yankie, owner of Cincinnati-based Homes + Inc., certified thermographer, and HERS home energy rater stated, "DUAL-VIEW makes it easy for my clients to understand the thermal camera images when they're placed side by side with the

same digital images."

PDmB, Inc., headquartered in Cincinnati, Ohio, is a leading provider of reporting solutions in the inspection industry, and has customers throughout the United States and the world. PDmB, Inc., is the developer of DUAL-VIEW Photo Report software, Palm-Tech Inspection software, and Palm-Tech Picture Album.
