

# Portable Pocket Gas Leak Detector

ACCURATE

AFFORDABLE

RELIABLE

## Features

- Unique, pocket-sized ergonomic design
- Locates leaks in pipes, valves, fittings, and tanks
- Highly sensitive solid state sensor
- Detects natural gas, methane, propane, butane, and hydrogen
- Alarm threshold: 5000 PPM methane, 2000 PPM propane
- Audible and visual alarms
- Operates for up to 8 hours of continuous use on 2 AA batteries
- Eye-catching emergency yellow housing

The Pocket Air Check® is a portable, battery-operated, solid-state instrument intended for use in applications requiring detection of combustible gas leaks. Handheld and highly sensitive, the Pocket Air Check makes finding gas leaks as easy as using

a flashlight, and at a fraction of what other portable detectors cost. The Pocket Air Check is a toolbox requirement for the HVAC technician, plumber, homeowner, or anyone working with combustible gas installations, especially natural gas or propane.
