

Your home is one of the largest  
and most important investments  
you will ever make.

## So why is it being inspected less often than your car?

Just like your vehicle, your house needs regular inspections in order to ensure its proper maintenance. As time moves on, parts of your house will wear out, break down, deteriorate, leak, or simply stop working. Routine inspections can provide early detection of these problems, minimizing the chance of costly repairs in the future.

For less than the cost of many scheduled car maintenance programs, I will visually inspect your roof and other structural aspects of your home, as well as the HVAC system, plumbing system, electrical service, and all the other major systems and components of your house.

Not just anyone is qualified to provide a thorough and professional inspection of your home. As the president and owner of A Critical Eye Inspection Service, as well as a certified member in good standing of the International Association of Certified Home Inspectors (InterNACHI), I inspect every home as if it were my own.
