

Leaf Defier®

Gutter Protection System

Leaves and debris slide off the surface or just dry up and blow away.

Leaf Defier® is factory treated with the new Advanced Protection™ Process

- Extreme Defiance™ Coating
- Biocide & Fungicide
- UV Stabilizer

Even during the heaviest of rainstorms, water flows straight through the Leaf Defier® into the gutter valley and out the downspout.

Open cell multi-polymer gutter insert utilizes 100% of the gutter capacity to allow maximum water intake.

Regardless of your roof pitch, Leaf Defier® handles the MOST water intake of any gutter protection system in the industry.

An absolutely worry-free, maintenance-free, cost-effective gutter protection system!

- Keeps your gutters clean and free of all leaves, seeds, pine needles, and insects
- Fits all standard 5" and 6" K Style gutters
- Eliminates mosquito breeding and infestation
- Flexible design won't bend, dent or crack like other aluminum guards, helmets or shields

Factory Treated With New Advanced Protection™ Process

- ✓ **Extreme Defiance™ Coating**
high-performance multi-polymer coating treatment provides superior protection against extreme weather conditions
- ✓ **Biocide & Fungicide**
inhibits growth of mold, mildew, fungus, algae and moss
- ✓ **UV Stabilizer**
prevents degradation from the sun
- ✓ **Fire Protected**

Monzi, LLC Enters Agreement to Support InterNACHI members with Discounts on Leaf Defier® Gutter Protection Products

Monzi, LLC, the nation's leading manufacturer of Foam Insert Gutter Protection Systems, has entered a strategic partnership with The International Association of Certified Home Inspectors (InterNACHI) that now provides organization members with discounts on featured Leaf Defier® Systems.

Designed with high-performance urethane polymers, Leaf Defier® is easily inserted into gutters to ensure leaves, twigs, pine needles and other possible obstructions are kept from entering and clogging gutter systems. As a result, water flows readily through the foam filter insert, into the gutter valley and out the downspout to virtually eliminate overflows that can infiltrate structures to cause foundation cracks and other forms of water-related damage.

The Leaf Defier® family of products was recently awarded the prestigious "Green Buildings Product Seal" from Green-Buildings.com due to its ability to meet several significant GREEN and high-performance building criteria. These include:

- Improving building durability and storm water management by aiding the even flow of water around perimeters and over larger surface areas
- Enhancing interior environmental air quality by controlling water gutter overflows, which can penetrate building envelopes and cause mold accumulations leading to additional indoor air quality threats

Recent research within the Pest Control Industry has confirmed the potential benefits of Leaf Defier® in preventing all forms of pests from entering the gutter cavity. The Health & Safety benefits of using the Leaf Defier® systems are huge when you consider that insects like mosquitoes breed in gutter water & carpenter ants and termites can build nests in the moist wood caused by the overflow from clogged gutters.

To ensure longevity, the Leaf Defier® family of products have passed Nationally Accredited Exterior Grade Weather Arc Testing. Lightweight and flexible, these systems also offer the highest water flow rates in the gutter protection marketplace, are proven fire-resistant to a 250 degree Celsius flashpoint and incorporate an environmentally safe biocide and fungicide to resist the growth of organic compounds.
