Employment History and Job Description:

Alutiiq Corporation LLC

January 2009- March 2009

Quality Control Inspector for temporary living facilities and visitor's quarters at Buckley Airbase. Duties included: Checking all electrical, rough and final stages, checking all mechanical, plumbing, and structural, including beam welds, placement, specifications, quality, and materials all being per ICC code 2007. Checked the unloaded material, such as shower pans, hand railings, cabinets, sinks, etc., checked for damage, color, and specifications. Meetings with Base personnel on any changes, additions, problems, and/or concerns on a weekly basis. Meetings as well with project manager, project engineer, general foreman, and superintendents to go over any problems, concerns, changes, and scheduling.

Actus Lend Lease**May 2007 to January 2009**

Site Superintendent for both Schriever and Peterson Air Bases. Submittal reviews, scope of work for subcontractors and building, as well as implementing the SWPPP and erosion control plans for both bases. Checking pads at Peterson Airbase for elevation and to make sure string lines and forms were correct before pours. Met with base personnel once a week to go over problems, concerns, situations, security, changes, etc. Also met with Senior Construction manager, safety coordinator, and project engineer to resolve any problems, concerns, changes, or situations that may have occurred on a weekly basis. Site work included: Tree removal, storm sewer, water, base fiber optic cables, drainage, detention ponds, temporary and permanent fencing, dust control, foreign object debris cleanup to not allow the debris interfere with the landing strip next to the construction site. Inspected framing, electrical, mechanical, and plumbing rough stages. Worked with subcontractors on submittals, safety plans, security for base, essential personnel, materials, etc. Coordinated and scheduled subcontractors to deliver and install materials.

Hi-Tech Environmental Testing LLC**September 2005 to May 2007**

Electrical and framing inspections on military housing project at Buckley Air National Guard Base.

Hunt Construction Company**April 2006 to May 2007**

Front end production superintendent for Hunt Construction Company at Buckley Air Base. In charge of all subcontractors, materials, production, and scheduling. Inspection and corrections if necessary through drywall mud and tape stage. All site utilities, grading, placement of transformers, water manes, drainage, detention ponds, etc. Road layout with curb and gutter, coordinated with city of Aurora engineers and myself.

City of Lonetree**November 2005 to January 2006**

Electrical plans examiner for commercial and industrial projects, worked with city engineer and planning department. Attended weekly meetings with city engineer, planning department, fire department, and police departments. Did inspections on all residential and commercial buildings in Lonetree, for electrical and framing.

City of Aurora Inspector**January 2004 to October 2005**

Inspector for framing and electrical, commercial and residential met with building supervisors, chief building official, on a weekly basis. Contributed input on new upcoming projects, buildings, golf courses, etc. Used stop work orders on projects in violation and followed through with city legal department. Worked with contractors and subcontractors to achieve best results for all parties concerned. Worked with building plans examiners, and other inspectors, on any problems, concerns, situations, to achieve an amicable outcome for all.
