- Learn how to recognize hundreds of building code violations!
- Learn how to make your inspection reports stand out!

The home inspection report is our #1 marketing tool. A minimum of 2 agents and 2 home buyers will see your report. Make it count!

Make your home inspection reports stand out from the crowd, with documented facts. (Code facts that apply, and equipment installation requirements)

Pointing out **only cosmetic defects** in a home will not make your telephone ring. Top agents will not be impressed!
