Family Air Care[®]

Indoor Allergens & Mold Test Kit

From the world's leading respiratory specialists, National Jewish Health[®]

Coughing, sneezing, runny nose, throat, eye irritation. Recognize the Symptoms?

Indoor Air Quality is a key factor in every home. The Family Air Care[®] Indoor Allergens & Mold Test Kit is designed to provide **InterNACHI** members and their clients information about levels of specific allergens present in the home being tested. It compares results to average levels in U.S. homes and levels associated with allergy symptoms in some individuals for possible corrective action.

You can provide this test to your clients with a service charge for your time

Importance

Both home buyers and sellers are concerned about living space air quality. The U.S. Environmental Protection Agency estimates almost 95 percent of our time is spent inside.

Physician Designed

The Family Air Care[®] Kit addresses indoor air quality by identifying and monitoring the most important triggers of allergy, asthma and other respiratory illnesses. Created by the world's leading lung specialists at National Jewish Health[®], the number one respiratory hospital in America since 1998 (*U.S. New & World Report*).

The Kit is easy to use and the most scientifically advanced test system for allergens, including mold, available on the market today.

The Family Air Care[®] Indoor Allergens & Mold Test Kit

- Attaches to the vacuum, is easy to use, and is an all inclusive kit, **requires internet access and a vacuum with a hose.**
- Results are available on-line for you to pass on to your customers
- Detects the most important triggers for allergies and asthma: mold, pet dander, dust mite and cockroaches
- Includes information booklet on allergens and molds
- Links to mitigation and other resources are available on-line
